

Outsourcing resources for software development from Egypt

Tailored to the needs of the Saudi Arabia market

Multiple Saudi Arabian companies and organisations find it difficult to hire professional software engineers in high demand to develop their businesses in the digital era, racing to a world of AI.

Not only is it hard to find the right people for software development inside Saudi Arabia. When you are trying to hire the right person who fits the requirements but is not a Saudi Citizen, you might, by law, need to hire another Saudi employee.

Making this hiring process simpler and more affordable is a perfect match for most Saudi Arabian companies.

Grow Knowledge offers recruitment services with highly skilled software developers from Egypt.

With us, you can solve your recruitment needs for software development and software development teams, build a digital future in the AI era, and excel in your business, no matter what industry you work in.

Grow Knowledge is an experienced strategic and trusted partner helping Saudi Arabian and Gulf States companies create and develop teams. We have worked since 2012 helping companies developing their software systems.

Our service will deliver the competence you need with the outsourced resources of excellence to a very compatible cost.

We are solely focusing on the Saudi Arabian market providing Arabian speaking expertise in all software developing skills with Computer Science degrees from Egypt Universities. We are located with Offices in Cairo and have partners in Damman, KSA.

With the help of the Grow Knowledge recruiting service, you will move your business forward with the right individuals at the right place with the right skills at a minimal cost in alliance with Vision 2030.

Grow Knowledge is part of a global Swedish-owned company group that helps companies excel in a digital online world that accelerates toward an AI future.

Contact us today to discuss how we can help your business grow with the help of highly skilled professional software developers from Egypt. We will move your company into the future of AI with higher productivity, growth and profit.
